For best results with lyme, break the lyme frequencies into several groups. Note the groups you get a detox (herx) from and repeat those groups 2 or 3 times a week. You may consider doing on occasion all the groups, because, even if you don't get a herx you could have some of those lyme stages in your body

## LYME DISEASE

*Experiment reported by one of our users*

It is suggested to use a treatment sequence such as 482, 485, 490, 495, 500, 505, 510, 515 520, 525, 530 and 780, 785, 790, 795, 800, 805, 810, then maybe changing to 480, 484, 494, 499 504, 509, etc. The idea is to vary the frequency now and then to accommodate any mutations but still stay in the 480[]530 and 780[]810 range. Additionally, it is said 432 Hertz is very good; 306, 312, 345 are good. It is suggested that a treatment be done three minutes per frequency, 2-3 times per week. Treatment needs to go on through “several seasons” (i.e., winter, spring, summer, fall, winter, etc.), because the Lyme spirochete both mutates frequently and can go dormant for a period of months. Also, use the syphilis spirochete frequencies of 600, 625 and 650. It is suggested to lessen the “die off” response by ending with the allergy frequencies, especially 3 Hz and 300, and 10K. Also, try using the frequencies listed under **toxins** (to eliminate).
